

Iason Filippopoulos

# Exploration of energy efficient memory organizations using data variable based system scenarios

Doctoral thesis  
for the degree of philosophiae doctor

Trondheim, September 2015

Norwegian University of Science and Technology  
Faculty of Information Technology, Mathematics and Electrical Engineering  
Department of Electronics and Telecommunications

Abstract . . . . .	iii
Preface . . . . .	iii
Acknowledgements . . . . .	iii
<b>List of Tables</b>	<b>vii</b>
<b>List of Figures</b>	<b>ix</b>
<b>List of Symbols</b>	<b>xi</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Embedded Systems and Energy Consumption . . . . .	1
1.2 Data Intensive Applications . . . . .	1
1.3 Problem Statement . . . . .	1
1.4 Proposed Solution . . . . .	1
1.5 Thesis Outline . . . . .	1
<b>2 Background</b>	<b>3</b>
2.1 System Scenarios . . . . .	3
2.2 DTSE . . . . .	3
2.3 Scratch-pad Memory Architectures . . . . .	3
2.4 Literature Overview . . . . .	3
<b>3 Methodology</b>	<b>5</b>
3.1 Data variable based memory-aware system scenario method- ology . . . . .	5
3.1.1 Interleaving exploration based on data variables . . . . .	5
3.1.2 Design-time profiling based on data variables . . . . .	5
3.1.3 Design-time system scenario identification based on data variables . . . . .	5

3.1.4	Run-time system scenario detection and switching based on data variables . . . . .	5
3.2	System Scenario Platform . . . . .	5
3.2.1	Target memory platform architecture . . . . .	5
3.2.2	Memory models . . . . .	5
3.2.3	Technology scaling . . . . .	5
<b>4</b>	<b>Research Results and Contributions</b>	<b>7</b>
4.1	Contribution A: Memory-Aware Methodology Development . . . . .	7
4.2	Contribution B: System Scenarios on Memory and PEs . . . . .	7
4.3	Contribution C: Integrated Interleaving and Data-to-Memory Mapping . . . . .	7
4.4	Contribution D: Interconnection Cost Scaling . . . . .	7
4.5	Paper A.I . . . . .	7
4.6	Paper A.II . . . . .	7
4.7	Paper A.III . . . . .	7
4.8	Paper B.I . . . . .	7

<b>5</b>	<b>Conclusions</b>	<b>9</b>

# List of Tables

# List of Figures

# List of Symbols

# Chapter 1

## Introduction

- 1.1 Embedded Systems and Energy Consumption
- 1.2 Data Intensive Applications
- 1.3 Problem Statement
- 1.4 Proposed Solution
- 1.5 Thesis Outline

## Chapter 2

# Background

- 2.1 System Scenarios
- 2.2 DTSE
- 2.3 Scratch-pad Memory Architectures
- 2.4 Literature Overview

## Chapter 3

# Methodology

- 3.1 Data variable based memory-aware system scenario methodology**
  - 3.1.1 Interleaving exploration based on data variables
  - 3.1.2 Design-time profiling based on data variables
  - 3.1.3 Design-time system scenario identification based on data variables
  - 3.1.4 Run-time system scenario detection and switching based on data variables
- 3.2 System Scenario Platform**
  - 3.2.1 Target memory platform architecture
  - 3.2.2 Memory models
  - 3.2.3 Technology scaling

## Chapter 4

# Research Results and Contributions

- 4.1 Contribution A: Memory-Aware Methodology Development
- 4.2 Contribution B: System Scenarios on Memory and PEs
- 4.3 Contribution C: Integrated Interleaving and Data-to-Memory Mapping
- 4.4 Contribution D: Interconnection Cost Scaling
- 4.5 Paper A.I
- 4.6 Paper A.II
- 4.7 Paper A.III
- 4.8 Paper B.I
- 4.9 Paper C.I
- 4.10 Paper D.I

## Chapter 5

# Conclusions
